Experience

Achievements

Developed multiple high profile projects, building mobile E-Commerce sites using ASP.NET MVC and client-side libraries such as Backbone.js, Require.js, Underscore.js, and jQuery

Completed proof of concept to quantify market sentiment based on social media data and algorithms.

Implemented Apple Pay for MLB, Accessory Pricing for Automation, Paypal for Beauty Brands and Google Pay for Payless Tablet.

Developed a real-time Ajax dashboard so managers could analyze current call center activities.

Conducted onsite client needs assessments in order to determine application design and flow charting for developing customized software packages for multi-year B2B clients, such as the Florida Department of Transportation, Florida Seaport Council, the Port Authority of New York/New Jersey, and the Puerto Rico Port Authority.

Developed an automated onboarding process for new hires, saving hundreds of hours of manual data entry. Coordinated with 6 separate departments and integrated with 12 proprietary applications. Application was implemented ahead of schedule.

Intangibles

- Solid blend of people & technical skills
- Ability to grasp & utilize new technologies
- Defining software system requirements
- Problem analysis & resolution
- Software troubleshooting & testing
- Establishing & nurturing client relationships

Fun Stuff

- Playing sax in a band
- Photography
- Craft Beer
- Watching Formula1
- Stand-up Comedy
- Bad Photoshop
